SANDVIK QA335 MOBILE DOUBLESCREEN

TECHNICAL SPECIFICATION

The QA335 Doublescreen is a highly versatile mid-sized screening solution equipped with Sandvik's world class Doublescreen arrangement. This innovative technology features two high velocity, angle adjustable screens, where both the primary and secondary screening angles can be adjusted to optimize screening performance and accuracy.

KEY BENEFITS

Reliability	 Premium components selected throughout for maximum durability Capable of operating in the most hostile environments Feeder load sensing facility to prevent blockages and unnecessary downtime 	
Productivity	 World class Doublescreen design 4 x 1.5 m / 13' x 5' enabling high throughput Doublescreen offers greater adjustability, increased accuracy and higher screening efficiencies The screen box delivers an aggressive and effective vibrating action up to 1200 rpm, meaning your output will be at optimum levels Both screens independently adjustable for greater screening accuracy Versatile unit, capable of producing large volumes of high specification product Large stockpiling capability through integrated hydraulic conveyors Large volume hopper with remote control hydraulic tipping grid User friendly PLC control system with sequential start-stop for speed and ease of set-up Choice of screen media to suit a wide range of applications Quick to set-up and easy to transport, resulting in more uptime and higher productivity Connected to Sandvik My Fleet with 7 year data subscription offering 24/7 fleet management, geo-fencing and remote operator support 	
Cost of ownership	 Latest generation fuel efficient engines provide maximum performance and cost efficiency Reduced fuel consumption through optimized hydraulic system and reduced engine RPM Well-proportioned fuel tank to maximize intervals between refueling Reduced cost of ownership through extended hydraulic fluid change intervals from 2000 hrs to 4000 hrs 	
Safety	 Mandatory audible and visual warning for safe operation whilst tracking and start-up / shut down Emergency stop buttons and conveyor pull stop cords around the plant for easy access during operation Wireless radio handset and two speed control for safe tracking onsite Wrap-around hydraulically operated maintenance platforms provide safe access for service and maintenance 	
Sustainability	 Latest emissions compliant engine lowers environmental impact due to reduced fuel consumption, less operation noise and low emissions 50 % by drawing fluid equing with extended convice interval from 2,000 to 4,000 hours.
